KOMATSU

Rental solutions

Accredited technicians, state of the art diagnostic equipment and advanced facilities ensure Komatsu Rental machines are fully serviced and maintained for the duration of your rental period.

In addition to the uptime benefits that come with professionally maintained equipment, Komatsu Rental solutions are designed to minimise your downtime and ensure long-term reliability of the machine you are operating.

Komatsu Rental's many packages ensure that you can choose one that suits your business requirements best. Whether you rent a single machine for a short period or multiple machines for 12 months, our rental options offer cost-effect solutions to help your business maximise long-term profitability.

Why rent with Komatsu:

- » No capital investment
- » Lower risk
- » Flexibility in fleet to meet project requirements
- » Choose from the latest earthmoving machines, equipped with industry-leading technology
- » Maintenance-free rental
- » Only national based Original Equipment Manufacturer (OEM) rental business

Mini excavators

The Komatsu mini excavators are smaller than their larger counterparts; however they are stacked with several features and benefits, these include:

- » Komatsu's Closed-centre load Sensing hydraulics for powerful performance,
- » Large operator stations with leading ergonomics for ease of operation and comfort,
- » Class leading accessibility for maintenance and servicing through tilting cabin platforms.

Model	Engine Power (kW@rpm)	Weight (kg)	Dig Depth (mm)	Bucket Breakout (kgf)
PC55MR-5	28.3@2400	5,140	3,770	3,980
PC88MR-10	48.8@1950	8,720	4,110	6,250

PC55MR-5 attachments: Hitch, GP bucket and tilt wide bucket.

PC88MR-10 attachments: Tilt hitch, GP bucket and wide bucket.

Excavators

Komatsu's construction and utility excavator range features class leading power output, stability, lifting capacity and operator comfort.

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components, in house. To achieve both high levels of productivity and economical performance, Komatsu has developed the main components with a total control system. The result is a new generation of high performance and environment-friendly excavators.

Model	Engine Power (kW@rpm)	Weight (kg)	Dig Depth (mm)	Bucket Breakout (kgf)

WA470 and above fitted with Weigh Scales and Printer

IMC

Komatsu's innovation intelligent Machine Control technology solutions will help you become productive today and into the future. iMC is designed to let operators focus on moving material efficiently, from bulk excavation to final time, without having to worry about over-excavation or damaging the surface resulting in improvement in efficient and productivity.

» Komatsu offers a range of "intelligent" machine control dozers and excavators.

» The intelligent dozer features the world's first fully automatic blade control system,

allowing them to carry out both bulk and final trim dozing from start to finish – with final grade performance.

» The intelligent excavator range has brought true machine control and automation to excavators for the first time, bringing significant advances in ease of operation and precision.

iMC technology allows our machines to increase efficiency across all operator skill levels, whilst reducing the cost of each meter of material moved.

Dozers

Komatsu Dozers combine a comfortable operator environment with the latest bulldozer technology – giving excellent performance over the whole working cycle of the machine. The high-quality components and a unique undercarriage design make Komatsu dozers the most cost efficient and productive machine in the market.

Model	Engine Power (kW@rpm)	Weight (kg)	Blade Capacity (m3)	Length (mm)

Dump trucks

With their powerful Komatsu engines, exceptional strength and state-of-the-art design, Komatsu dump trucks transport heavy loads quickly, easily and cost effectively. Komatsu dump trucks are available in rigid and articulated version. They guarantee complete driving safety, even at high speeds.

From the transmission system and chassis to the axles and suspension, all the components are designed to handle demanding daily stresses for maximum reliability and productivity.

Dump Trucks - ADT

Komatsu's latest technology available for rent.
3D fully integrated factory installed GPS machine control.
Experience the next level of machine control.
Training offered on delivery.

Komatsu PC210LCi-10 fully integrated machine control

Fitted with dig and weed buckets, tilt and breaker lines, quick hitch, anti drop valves, 3 x emergency stop switches, hand rails, side bump rails, Hi visibility labelling, battery isolator, starter isolator, jump start connection, fire extinguishers, flashing light, full length sill protection, ROP's cert cab, FOP's protection, Komtrax tracking system.

Komatsu D65PXi-18 fully integrated machine control

Pat blade, idle timer, battery isolator, starter isolator, jump start connector plug, Hi visibility labelling, 9kg fire extinguisher, 1kg fire extinguisher in cab, reversing camera, rippers, 760mm grouser plates.

EX Models available fitted with 600mm grouser plates and Sig

All units and offers subject to availability at the time of request.

Models, machine specifications and attachments shown above are subject to change.

All machines listed within this brochure are an example of models in our fleet of low hour, near new construction equipment at Komatsu Rental New Zealand.

Units outside what is published, can be made available if require to suit specific specifications and terms.
